

AS-IS and TO-BE process maps for car payment tracking automation v1.0

AS-IS Actors: Leasing agent, Customer, Finance agent

TO-BE Actors: System, Customer

Efficiency gains

1. Removing the leasing agent from late payment process added an extra 2 hours every day to focus on revenue generating activities such as marketing and admin
2. Automating the claims dispute process has had a boost on morale as the finance agent now deals with 65% less irate calls and unreasonable customers, it also added an extra hour to focus more on financial reporting and revenue analysis
3. There is 80% drop in missed revenue because the process is automated and the query runs on a 24 hour loop, capturing any defaulters in time for claim review. The other 20% is due to unresolved claim disputes.
